Gage Telephone Systems, Inc. Offers Innovative Data Backup Solutions to Protect Their Customers' Critical Information

Region's Leading Unified Communications Provider Supports Business Continuity Planning While Enhancing Peace of Mind Among Small to Mid-sized Companies

Baton Rouge, LA — May 27, 2010 — Gage Telephone Systems, Inc., an industry leader in unified communications, announced today that the company is offering innovative, off-site, data back up solutions to protect their customers' critical information. In an effort to enhance business continuity planning among the region's small to mid-sized companies, Gage Telephone Systems, Inc. provides owners with the peace of mind know that their valuable information is continually backed up in the event of a natural disaster, power outage, or virus attack.

More than ever before, today's market is pressing owners to reexamine the threats that could cause business interruption. According to an information security breaches survey conducted by DTI/PriceWaterhouse, 70% of businesses that suffer a serious data loss are out of business in 2 years. Many risks are unavoidable but technological advances have created a way for businesses to continue to run smoothly, even in the midst of uncertainty.

Organizations of all sizes are generating and depending on larger amounts of data that must be readily available and easily accessible. Consequently, companies have to effectively manage more infrastructure resources, including servers, networks, and storage, to ensure data is protected in a timely manner while at the same time providing adequate performance and capacity and securing data for access when needed. Unfortunately,

the archaic data backup method for most companies is to backup vital information on a data tape and let an employee such as an IT manager take it home for safe keeping. Today's latest technology enables the backup of information to take place on the "cloud" instead of servers on-site. Therefore, if an event should occur the business can keep running as if nothing happened.

"The concept of business continuity is experiencing a growth in popularity, and experts are attributing this primarily to its simplicity," Jason Landry, VP of Sales of Gage Telephone Systems. "As a business owner, operating without a data backup solution in place is simply a risk I would not be willing to take. The pace of today's business environment is faster than it has ever been, and business owners cannot afford to lose their valuable data. In my opinion, it's like driving over 100mph without wearing a seatbelt," commented Landry.

All businesses face a certain degree of risk, but most intelligent business owners are looking to eliminate unnecessary risks as well as uncertainty. Disaster recovery solutions provide business owners with a safety net that enables organizations to get back up and running before anyone notices that there was a slip-up. Whether a natural disaster, virus attack or power outage, remote data backup provides businesses with the assurance that they will be able to compete in today's markets.

ABOUT GAGE TELEPHONE SYSTEMS

GAGE Telephone Systems, Inc. was established in 1980 by Gregory A. Wood, Sr. The company's original mission continues today, which is to provide the very best products and services that enable its clients to increase their profitability, obtain a competitive advantage, and improve employee productivity. GAGE has served the Baton Rouge and South Louisiana business community for nearly 30 years through a culture of striving towards excellence and unparalleled commitment to customer service.

GAGE helps companies of all sizes simplify their technology decisions with straight answers about everything from business telephone systems and computer networking to VoIP and voicemail services.
