Gage Telephone Systems, Inc. Increases Customer Profitability in a Down Economy with the Latest Technologies

*Region's Leading Technology Provider
Helps Businesses Do More with Less*

Baton Rouge, LA – February 28, 2011 – Gage Telephone Systems, Inc., an industry leader in unified communications, announced today that the company is relentlessly educating its customers on the latest technologies designed to increase their profitability and enhance employee productivity, particularly in these tough economic times. The technologies that Gage Telephone Systems is focusing on helps companies do more with less. While the economic whiplash has sent many companies back to the starting block, others are capitalizing on these types of advancements to better position themselves for recovery. The financial gurus may try to convince business owners that a dreaded double-dip is imminent, but for the technologically adept, an uptrend is more likely. Gage Telephone Systems, is paving the way by introducing businesses to leading edge technologies that drive profitability, now.

“We understand that the economy has mounted tremendous pressure on our customers to be more productive, with fewer resources at their disposal. We believe that it is our responsibility to proactively search and deploy solutions that drive our customers’ profitability and provide them with a competitive advantage. It’s up to us to make sure that our customers have technology that enables them to do more with less,” stated VP of Sales, Jason Landry.

One of the ways that Gage Telephone Systems is boosting customer profitability is through an application called presence management. This application eliminates the guessing game of knowing where people are and what they’re doing, and allows individuals to indicate their status (in a meeting, “back at 2pm,” at lunch, “send calls to my cell”, etc.) and promises “you’ll never miss a call again.” By increasing the speed of communication, more opportunities can be seized; more current customers can be satisfied, and more profits can make it to the bottom line.

Similarly, Gage Telephone Systems is utilizing call recording technology in order to help organizations increase employee productivity. According to Dr. Jon Anton from Purdue University, “On average, employees answer the phone 19% faster, spend 29% less time on the phone and do after-call work three times faster when they know they’re being recorded.” Remarkably, many business owners have not adopted call recording technologies. Gage Telephone Systems, Inc. is looking to “bridge the gap” by educating their customers on solutions aimed to help small to mid-sized businesses come out on top.

ABOUT GAGE TELEPHONE SYSTEMS

GAGE Telephone Systems, Inc. was established in 1980 by Gregory A. Wood, Sr. The company’s original

mission continues today, which is to provide the very best products and services that enable its clients to increase their profitability, obtain a competitive advantage, and improve employee productivity. GAGE has served the Baton Rouge and South Louisiana business community for nearly 30 years through a culture of striving towards excellence and unparalleled commitment to customer service.

GAGE helps companies of all sizes simplify their technology decisions with straight answers about everything from business telephone systems and computer networking to VoIP and voicemail services. The company conducts a complete needs analysis to ensure that each customer implements the right technology to meet their needs now and into the future.

GAGE has built a strong team of highly experienced and industry certified voice and data specialists. These individuals proactively assist customers through high level support and strive to exceed their expectations on a daily basis. The team is backed by a fleet of state-of-the-art service vehicles ready to respond to customer calls 24 hours a day, 7 days a week. GAGE has distinguished itself from the competition by becoming one of the region’s leading telecommunications companies.
